COVID-19 Update

March 19, 2020

As COVID-19 affects countries around the world, travel health concerns have never been more prevalent.

Valneva's top priorities are the health and safety of our employees, our business partners and the people we serve.

In order to reduce the risks associated with COVID-19, Valneva has included remote work in its business continuity plan for both head office and field-based employees. We are doing everything possible to support our community during this challenging time, including taking measures to ensure adequate vaccine inventory when the situation returns to normal.

When international travel eventually resumes, we will do everything necessary to ensure Canadians have access to our vaccines. At the present time, we encourage everyone to follow the guidelines of their local health authorities.
